

FIG. 1 is a schematic diagram of a circular optical device, likely a lens or mirror assembly. The diagram shows a large outer circle (10) and a smaller inner circle (12). Four smaller circles (30) are arranged in a ring within the inner circle. Lines connect the centers of these four circles to the center of the inner circle. Angles α and β are indicated. Labels include 10, 8b, 15, 11a, 8c, 30, 8d, 12, and 30.
